

ROAD TO RECOVERY THROUGH COVID-19

Since 1970, Renascent has served more than 50,000 people impacted by addiction. During this very difficult time, we remain committed to providing our essential services while keeping our staff, clients, and community safe. Here's how:

Assessment & Screening

Our Access Centre team will assess and screen incoming clients by phone. If Renascent is the best fit, the team will determine one of two care pathways to best meet each client's needs.

Two-Stage Inpatient Addiction Treatment Program

Stage 1:

14-day medically-monitored stabilization with our highest levels of infection control, including **pre-admission COVID-19 testing**. The first stage of the program will include individual and virtual group therapies, and will be delivered at our Punanai Centre for both women and men.

Stage 2:

Upon completion of Stage 1, clients will transfer to our gender-specific centres, Sullivan and Munro, for our 28-day comprehensive addiction treatment program. Our treatment centres will continue adhering to strict infection control and prevention measures.

Virtual Outpatient and Support Programs

Clients will be supported by our new series of **Virtual Outpatient Programs**:

- Intensive Outpatient Addiction Treatment
- Pre-Admission Support Groups*
- Family & Children Programs*
- Continuing Care Programs*
- Alumni Support Groups*

*Available to both Inpatient and Outpatient clients

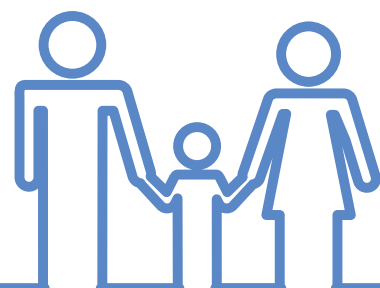

Continuing Care & Alumni

As clients successfully progress through their treatment programs, Renascent will provide ongoing virtual support via our Continuing Care Program and Alumni Support Groups.

Family & Children Programs

Our Family and Children Programs will be delivered virtually to family members and loved ones using group and individual psychotherapy sessions.
